

Calculating Costs Worksheet

1. Select an amusement or recreation venue that you would like to visit and add name and city in center of the circle. You may use the link provided.
2. Visit the website and research the cost of the entry ticket prices and fill in the triangles. Include cost per day, 2, 3, or 4 day prices, family rate, extra fees, and any other important cost information that you would like to include in your vacation.

USA Theme Parks, Amusement Parks,
Waterparks, and Zoos

The diagram consists of a large central oval with two horizontal lines inside for text. Surrounding the oval are eight triangles pointing outwards, intended for students to write cost information.

Cost estimate:

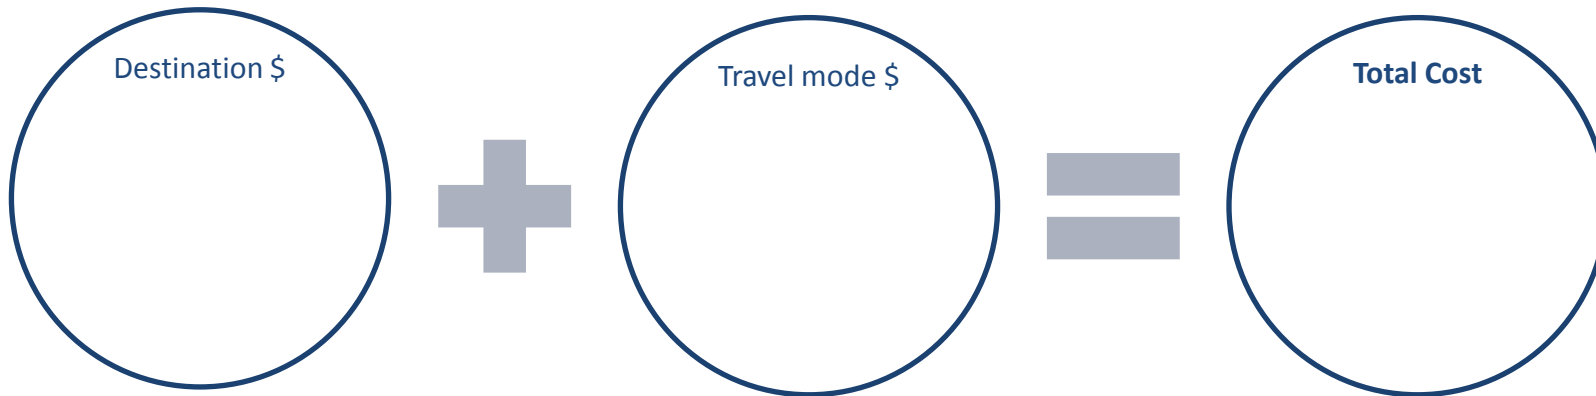

\$ _____

3. Select a travel mode and calculate the cost from your city/town to your venue. More than one mode of travel may need to be selected to reach your destination.

Cost estimate:
\$ _____

4. Estimate the cost of your destination plus your mode of transportation to the total cost.

5. Is this trip worth the money? _____

6. How will you save up for it? _____

Extra credit: Research the cost of a hotel at your destination and add the cost to your trip.
