

Lesson Plan Project

Directions: Visit the Texas Essential Knowledge and Skills webpage at:
<http://www.tea.state.tx.us/index2.aspx?id=6148>

Select an elementary, middle school or high school course TEK(s)/student expectation(s) of your choice. Complete a lesson plan template using the following resources:

- The selected TEK(s)
- Blooms Taxonomy Action Verbs
- Ideas for Special Populations Accommodations
- Tips for Working with LEP Students
- Integrating five different forms of technology in the lesson plan

Use the Sample Student Profile handout and select five different students along with regular education students to base your lesson plan on.

For example: My 2nd period Family and Consumer Sciences class is made up of 22 freshman students. I have eight regular education students, three students with learning disabilities in math, three LEP students, four migrant students, one Gifted and Talented student and three students with learning disabilities in writing.

Your lesson plan must include accommodations for all your special needs students.

Project will be assessed using the Lesson Plan Project Rubric.

If time permits, teacher may allow students to teach the lesson to the class.
