

## Rubric for Technology in Counseling and Mental Health Services Project

**Task Description:** Using the situation card you selected, think of effective networking tools and technology that can be utilized in counseling and treatment techniques of the client(s). Create an infographic or poster. The contents of the infographic must include:

- a clear focus on the use of technology in counseling and mental health
- five networking tools and technology-based methods such as social media
- technology-based methods for collecting and disseminating health care data such as using tablets for replacing the conventional paper-based way of tracking patient’s record
- three free appropriate mobile applications (apps)
