

Site-Based Decision-Making

TEA defines site-based decision making as follows:

Site-based decision making is a process for decentralizing decisions to improve the educational outcomes at every school campus through a collaborative effort by which principals, teachers, campus staff, district staff, parents, and community representatives assess educational outcomes of all students, determine goals and strategies, and ensure that strategies are implemented and adjusted to improve student achievement.

Brainstorm with your group an area that needs improvement in your school.

Use the **FCCLA Planning Process Worksheet** to come up with a possible solution.
